

(Computer Programmer Resume / [www.how-to-write-anything.com](http://www.how-to-write-anything.com))

## Pat Brown

123 Main Street, Any Town, STATE, 10001 | [email@email.com](mailto:email@email.com)

### OBJECTIVE

A system, web and application programmer with years of experience as a .NET, C, C++, .ASP, XML and API developer is looking for a developer position in software industry.

### JOB QUALIFICATIONS

- M.I.T. Master in Computational Programming.
- Experienced in application, web and system programming.
- Cool under fire. Excellent at meeting tight deadlines.
- Can design functional specs based on marketing specs.

### WORK EXPERIENCE

#### CROM-TECH Inc.

Bethesda, MD

Senior Developer

May 2005 – Present

- Designed and led a developer team to implement an AJAX-based medical bill auditing interface.
- Wrote project specs to integrate development with unit and system testing phases.
- Saved \$300,000 annually by developing a debugging system unique for the company's flagship software product.
- Represented the development department in client meetings.

#### PARVATI ENGINEERING

Boston, MA

System Developer

June 2002 – May 2005

- Wrote code for the system configuration module of banking software.
- Adapted and upgraded the legacy bug-tracking software to the company's existing software-hardware platform.
- Developed a system algorithm to cut down on development time by 15%.

#### MED-CART

Miami, FL

Web Developer

October 1999 – June 2002

- Designed ecommerce carts by using C on a .NET platform
- Designed and developed SQL user databases and wrote API modules.
